WHOLESALE CATALOGUE

of bulbs

HUBERT BULB Co.
PORTSMOUTH, VA.

America's Largest Bulb Growers.

TO OUR FRIENDS AND SUPPORTERS

T IS WITH pleasure that we submit our revised "WHOLESALE LIST OF AMERICAN-GROWN AND IMPORTED BULBS" for season 1916.

Most of the bulbs herein listed have been grown here in Virginia where the soil and climate are ideal for their perfect development and, at this writing, with our lifting practically complete, we are able to report an exceptionally fine lot of bulbs. Our Imported stock comes direct from our European branches and connections and is the best procurable.

Our home-grown bulbs bloom from a week to ten days earlier than imported, thus saving considerable fuel when quantities are grown under glass.

Remember, when comparing prices, you have no duty, import freight charges, cases or packing to pay.

Large Planters and Dealers wishing to purchase bulbs in large quantities should write for special prices. While we have made prices in this catalog very low, yet where a number of thousands are wanted we can frequently supply them at a lower cost.

We respectfully call the attention of our customers to the advantage of placing orders at an early date, which not only insures getting the First Pick, but also prompt delivery of their orders.

War conditions have had the effect of materially reducing prices on a number of Dutch bulbs, noticeably Hyacinths and the more expensive varieties of Narcissus and Tulips. IN EVERY CASE WE GIVE OUR CUSTOMERS THE BENEFIT OF ANY REDUCTION.

We warn our patrons against entertaining very low offers from questionable houses, auction sales, etc. Every bulb listed in this catalog has a marketable value in it's season and when stocks are offered at ridiculous figures it is apparent that either the quality is inferior or that some cheaper variety is being substituted for the variety offered. WE GUARANTEE EVERY BULB WE SELL TO BE ABSOLUTELY TRUE TO NAME AND WILL REPLACE ANY THAT PROVE OTHERWISE.

To those who have never tried our bulbs, we might say, by way of inducement, that our stocks are being used more extensively all over the States by dealers as well as growers, who send us very gratifying reports as to their blooming qualities. It is also very gratifying to us to note that our first customers still continue to send us their orders and to recommend us to their friends.

If we number you among our customers we trust that our bulbs and service have been so good as to warrant a continuance of your patronage.

IRIS HISPANICA (Spanish Iris) Imported Bulbs

Spanish Iris are rapidly gaining favor with Florists throughout the country and are being used more extensively each season. They are easily grown outdoors, needing no protection except in very cold sections. It is for forcing that we particularly recommend them, as they can be had in bloom the latter part of March and invariably bring fine prices. To assure the greatest success with these for this purpose it is essential that the largest size bulbs be used and for this purpose we are offering extra large bulbs of varieties best adapted.
